## **THE SCIENCE OF AIR: PROJECTS AND EXPERIMENTS WITH AIR AND FLIGHT**

Steve Parker  
\$20.50 Paperback, 32 pages  
Heinemann Library, Chicago  
ISBN: 1-4034-7280-4  
<http://heinemannlibrary.com>

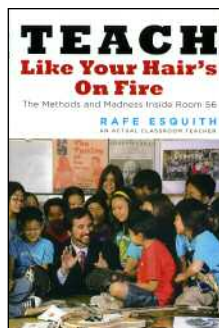

**GRADE 4-6** The science of air is also all around us, vast and exciting. Hands-on activities for grades 4 through 6 include building and testing anemometers, barometers, sails, wind chimneys, wind turbines and thermometers, to name a few. The excellent illustrations make this an ideal companion for teaching elementary technology and pre-engineering along with science.

## **A WEIRD HISTORY OF SCIENCE: BIZARRE BIOLOGY**

John Townsend  
\$23.00 Paperback, 56 pages  
Raintree, Chicago  
ISBN: 978-1-4109-2381-3  
<http://www.heinemannclassroom.com>

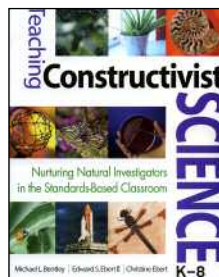

**GRADE 6-9+** Biology is the science of life. It studies plants and animals including human life. This book illustrates the discoveries humans have made throughout history by studying life and death.

## **TEACH LIKE YOUR HAIR'S ON FIRE, THE METHODS AND MADNESS INSIDE ROOM 56**

Rafe Esquith  
\$24.95 Hardbound  
Viking Penguin, New York  
ISBN: 978-0-670-03815-2  
<http://us.penguin.com>

From the classroom teacher whom The New York Times calls “a genius and a saint” comes a revelatory program for educating today’s youth. Rafe Esquith reveals the techniques that have made him an acclaimed educator. The two mottoes in Esquith’s central Los Angeles classroom are “Be Nice, Work Hard,” and “There Are No Shortcuts.” His students voluntarily come to school at 6:30 in the morning and work until 5:00 in the afternoon.

## **TEACHING CONSTRUCTIVIST SCIENCE K-8 NURTURING NATURAL INVESTIGATORS IN THE STANDARDS-BASED CLASSROOM**

Michael Bentley, Edward Ebert,  
Christine Ebert  
\$34.95 Paperback  
Corwin Press, Thousand Oaks  
ISBN: 978-1-4129-2576-1  
<http://www.corwinpress.com>

The first part of this book helps teachers develop their own concept of what comprises science in elementary and middle school by looking at national standards and frameworks. The rest of the book is devoted to developing dynamic, interactive, hands-on approach to learning that capitalizes on the curiosity of children and adolescents.
